Portfolio: <https://benaportfolio.vercel.app>

PROFESSIONAL SUMMARY

Full-stack developer with 6 years of fintech experience in high-volume loan processing and regulatory compliance. Graduated from TripleTen's software engineering bootcamp with focus on React, Node.js, and modern web development. Combines technical skills in frontend and backend development with proven attention to detail and quality assurance from processing 100+ financial applications weekly with 99.9% accuracy.

TECHNICAL SKILLS

Frontend: React, Next.js 14 (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, HTML5, CSS3, React Router, Context API, Zustand, Three.js, React Three Fiber

Backend: Node.js, Express.js, MongoDB, PostgreSQL (Supabase), RESTful API Design, Row-Level Security, Server Actions, Webhooks, JWT Authentication, node-cron

Tools & Technologies: Git/GitHub, Stripe, Supabase Auth, Vitest, Jest, Vercel, Railway, Vite, npm, Postman, Winston, Nginx, @react-pdf/renderer, Resend

Development Practices: TypeScript, Vertical Slice Architecture, Mobile-First Responsive Design, BEM Methodology, Automated Testing, Centralized Error Handling, Data Validation, Agile/Scrum

Fintech Experience: Loan Processing Systems, Risk Assessment, Regulatory Compliance, Financial Data Verification

PROJECTS

HomeWise | Full-Stack Home Maintenance Web App

Live: yourhomewise.app | GitHub: github.com/thebenstenator/homewise

- Built a home appliance maintenance tracker that generates smart maintenance schedules, sends weekly email reminders, and routes users to local professionals via affiliate deep links
- Designed a seed-data-driven appliance type catalog covering 15 appliance categories with accurate maintenance intervals, DIY resources, and Amazon product affiliate links
- Implemented a Home Health Score algorithm (0–100) that grades a homeowner's maintenance posture based on overdue tasks, priority weighting, and recent activity
- Integrated Resend email service with node-cron scheduling for weekly maintenance digest emails with contextual DIY and "Find a Pro" calls-to-action
- Stack: React, Node.js, Express, MongoDB, Tailwind CSS, JWT, Resend, Vercel, Railway

BoardFoot | Full-Stack SaaS Application

Live: boardfoot.app | GitHub: github.com/thebenstenator/boardfoot

- Built a woodworking cost estimator and bill of materials planner with real-time board foot calculations, waste factor math, and live cost summary — deployed to production with paying users
- Implemented Stripe subscription billing with free and Pro tiers, webhook integration, and customer portal for self-serve subscription management
- Designed vertical slice architecture with pure TypeScript calculation functions, 51 unit tests, and Supabase PostgreSQL with Row-Level Security for multi-tenant data isolation
- Generated PDF exports using @react-pdf/renderer with tiered branding (free: branded, Pro: clean), served via Next.js API routes
- Stack: Next.js 14, TypeScript, Tailwind CSS, shadcn/ui, Supabase, Zustand, Stripe, Vitest, Vercel

CustomSeal | Custom Moisture Chamber Glasses Builder

GitHub: github.com/thebenstenator/custom-seal

- Developed open-source React application enabling users to design custom 3D-printable moisture chamber attachments for glasses
- Implemented interactive 3D model visualization using Three.js and React Three Fiber for real-time preview of glasses on head models
- Built component-based architecture with React Router for multi-step user flow including frame selection, 3D preview, and scan upload
- Designed accessible, responsive UI using BEM methodology and custom CSS with focus on medical accessibility needs
- Integrated file upload system for 3D scans (STL/OBJ formats) with client-side validation and error handling
- Stack: TypeScript, React 19, React Router 7, Zustand, Three.js, Tailwind

PROFESSIONAL EXPERIENCE

Auto Loan Specialist | **Lending Club National Bank** July 2019 – July 2025

- Processed 100+ loan applications weekly using fintech platforms, maintaining 99.9% accuracy in data verification
- Ensured regulatory compliance with federal and state lending regulations across 50+ jurisdictions, demonstrating attention to security and quality standards
- Optimized workflow processes, reducing application processing time by 15% while maintaining quality standards
- Collaborated cross-functionally with underwriting and compliance teams to resolve complex issues efficiently

Manager | **Village Pizza** January 2017 – June 2019

- Led team of 10+ employees, managing operations and implementing process improvements that increased efficiency by 20%
- Communicated effectively with team members to ensure operational goals were met

EDUCATION

Software Engineering Bootcamp | **TripleTen** Graduated Spring 2026

Comprehensive training in full-stack web development including React, JavaScript, Node.js, Express, MongoDB, HTML, CSS, Git/GitHub, RESTful APIs, Component Architecture, State Management, Responsive Design, Code Reviews, and Agile/Scrum Methodologies, Automated Testing with Jest, Centralized Error Handling, Logging, and Data Validation

Digital Media | **Utah Valley University** 2015

Completed coursework in Multimedia Design, Digital Content Creation
